

IGSU team intervention on Sfântul Andrei street in Chisinau municipality

in the afternoon of September 22, 2025 specialized CBRN teams from the General Inspectorate for Emergency Situations together with representatives of the National Agency for Nuclear and Radiological Activities, intervened on Sfântul Andrei no. 20, in the Rîșcani sector of the Capital, after a call was received at the service 112 such as the radiation level at the indicated address would have increased.

At the scene, specialists were directed who perform measurements and take actions to verify and establish the source.

The area is assured so that citizens do not have access to the verified perimeter.

At the moment there is no danger to people. The on-site research is to establish all the circumstances of the case.
