

# Warning - yellow rain code: GIES urges the population to comply with safety measures

in the context of the meteorological warning issued by the state hydrometeorological service, between 07 and 08 October 2025, long-term rains will be recorded throughout the country, with water accumulation between 15 and 49 l/m<sup>2</sup>, and isolated can reach values ??of 50-90 l/m<sup>2</sup>.

in this regard, the General Inspectorate for Emergency Situations repeatedly urges the population to comply with the following safety measures:

- In case of heavy rainfall, shelter in a safe building or a vehicle away from electric wires and trees that may fall.
- Supervise the children and do not allow them to be near the flood risk areas.
- Do not cross the street in front or back of stationed vehicles to prevent accidents.
- Avoid parking the vehicles under the trees or near the electricity pillars.
- Do not move through flooded areas, even if the water level seems low.
- Drivers are asked to reduce speed, keep the safety distance between vehicles and avoid sudden braking.
- Aquatic basin management are urged to check the condition of dams and water exhaust systems, constantly monitoring them during heavy rains, to prevent spill.
- People living in slope areas are asked to avoid places of landslide, not to park near watercourses or inclined trees and not approach these areas during rain.

in case of emergency situations, call service 112.

GIES teams monitor the meteorological situation throughout the territory of the non-stop and are prepared to intervene promptly to liquidate any exceptional situations.
